

WARM LIFE

2023-2024

PREFACE

Knitting as an innovation has a history that only spans just over 400 years in the entire textile industry, the most rapid development occurring in the most recent century. This shows that human beings have been paying more attention to comfort and warmth in life over the past century.

Loose, flexible, comfortable, convenient, suitable for outdoors, environmentally friendly, ecological, organic, and sustainable have become some of our biggest factors to consider in the pursuit of modern day life. The launch of **Warm life** seeks to take into account these factors and bring people together towards a better life.

Since its establishment in 1996, Foremost Company has attached great importance to knitting products. In 2003, in order to serve customers faster and better, we established our very own knitting factory. In the past two decades, our orders for knitted products have increased by about 15% per year on average, and we predict that there will be greater demand in the market in the future. **Warm life** (2023-2024 Knitting Collection) On one hand, it shows the strength of our team, and our resoluteness to do everything possible in order to best serve our customers. But on the other hand, it also shows how determined we are to help our customers succeed in an industry that faces fierce competition. We are optimistic that the launch of **Warm life** is at the right time.

At Foremost , we consider everything to be possible. Only a team that thinks out of the box to solve problems can make customers worry-free, reassured and happy. Through our strive for excellence we hope to be that team.

Knitting, as a massive sector in the clothing industry, has infinite possibilities. Let's explore, develop and design products that are better and more beautiful together. Making things that in the past were thought to be impossible possible.

Let's remember together :

The word impossible is itself just one stroke of a pen away from being "I'm possible".

Jeffrey

PREFACE

Wishing peace to all, we hope these words find you well. Over the past three years, we have not been able to travel or visit our customers. However, we have had more time to polish our products, after all ingenuity benefits from time and cultivation. During this special time, we did not stop making progress; instead, we concentrated on designing and developing new products as well as how to present these products perfectly to our partners. Therefore, the idea of making a product catalogue came into being.

In the beginning, I just wanted to make a catalogue focusing solely on knit hats. However, after the epidemic began to wane, we immediately traveled to the United States and Japan to visit some old friends as well as customers. During our many conversations, we realized that many customers did not fully understand our production capabilities and product range. Thinking again and again, we decided to make a full-category knitting sample catalogue in the hope that we could shed some light onto the understanding of our customers about our ability to manufacture products, provide services, and provide a one-stop solution.

Although we only focus on clothing accessories, we believe that the publication of this manual will transmit warmth and beauty beyond your wildest expectations. Furthermore, the fact that a seemingly simple product catalogue can deepen our communication with each other, promote each other's growth, and maintain our advancement also proves that we are on the right track.

Finally, I would like to say thanks to the design team, business team, and R&D team for their constant strive for excellence in products and details, all of which made the impossible possible. We also hope that this sample catalogue will convey to everyone our diligence and our passion towards creating a better life.
